New Judas

Say hello to your new best friend New Judas, unleashed from the wonderland of Finland and armed with a raft of warped up frequencies and beats so big they could bring Mike Tyson to his knees! Bringing together a family of the most talented and sinister **Finnish** electronic artists, to create a sound that can only be described as a 'kick in the eye!'

Waving the flag for the sound of Finland's musical underground, setting a global standard with the most forward thinking electronic music this fine land has to offer... Old foxes such as **Huoratron** rub shoulders with young upstarts **Pets on Prozac** whilst **Obi Blanche** and **Them Shepherds** play dice games out the back. With jaw dropping **live shows** and genre spanning **dj sets** to boot, these Vikings of the north are set to take over new continents through the power of raving and pillaging! Mind bending designs and artwork from the **Vänskap** collective slap you round the eyes for a visual shake up, poketing your lunch money in the process. Keep your ears firmly to the ground as you expect dinner invite from the **New Judas** family very soon...
