

Consumer Messaging

Nokia Messaging

Nokia Messaging is Nokia's consumer messaging service for Nokia S60 and Series 40 devices that includes access to email and instant messaging (IM). With one Nokia device, you can manage all your email and IM accounts and stay connected with your favourite and most important contacts. You don't need a separate device just for email.

Nokia Messaging is easy to install; you only need your email address and password to mobilize your email or IM account. You can manage all your email and IM accounts from just one menu. Push technology enabled with key ISPs (Yahoo! Mail, Windows Live Hotmail, Gmail, AOL Mail) means emails are delivered to the device instantly – there's no need to constantly go to the mailbox and search for new emails. Nokia Messaging is also easy on the pocket, as costs become predictable with a fixed data plan.

Nokia Messaging will launch commercially in the first quarter of 2009 in Australia, Finland, Germany, the Netherlands, Singapore Spain, the United Kingdom and Venezuela, and in select countries later in the year.

ovi

Mail on Ovi

Mail on Ovi gives users 1GB of storage space and spam filters to block unwanted emails. Creating a Mail on Ovi account will give users access to their email, as well as cross access to other Ovi services, both on the mobile phone and on the PC.

The beta version of Mail on Ovi will roll out globally in December 2008 in 12 languages, including English, Spanish, Portuguese, French, German, Hindi, Bengali, Tagalog, Bahasa Indonesia and Bahasa Malaysia on all currently shipping Nokia Series 40 devices, with many more languages to be added later. The web access version will launch in February 2009.

Corporate Messaging

Mail For Exchange

Mail for Exchange utilizes the Microsoft Exchange ActiveSync protocol, enabling wireless synchronization of Microsoft Exchange email, calendar and contact data, as well as providing access to the global company directory.

Mail for Exchange is supported over a mobile network or wireless LAN and ensures data security by using an encrypted HTTPS connection that is established and maintained between the device and the server. Direct access to the Microsoft Exchange server ensures that synchronization is fast due to enhanced data compression, leading to a quicker experience when sending and receiving messages.

Mail for Exchange available for all Nokia S60 3rd Edition devices, including all Nokia Eseries and Nokia Nseries.

Lotus Notes Traveler

Lotus Notes Traveler, developed by IBM and Nokia, features real-time IBM Lotus Notes push email and PIM synchronization, with no additional server or middleware required.

This real-time replication includes email (with attachments), calendar, address book, journal and to do lists and is available for all Nokia S60 3rd Edition devices, including all Nokia Eseries and Nokia Nseries. The client is available at no extra cost with new Lotus Domino servers and is delivered securely by IBM and IBM Channel partners.
