

WINDOWS LIVE

Important: Only install and use applications and other software from sources that offer adequate security and protection against harmful software.

In the menu, select **Download! > Windows Live**. This folder contains applications such as Windows Live Messenger and Hotmail and Windows Live Spaces. If you do not see WinLive in your **Download!** folder, please select **Options** menu, and **Refresh list**. **WinLive** should appear after the list has been updated. To download and install applications in the **Windows Live** folder, do the following:

1. To start the installation, scroll to an application, and press the scroll key, or select **Options > Get**.  indicates that you may have to install some other files before you can download the application. When you install these files, accept all queries.
2. To install the application, select **Yes**. Details about the application are displayed.
3. To proceed with the installation, select **Continue**.

After the installation is completed, the application opens automatically.

To open the application in the **Windows Live** folder later, scroll to the application, and press the scroll key. The installed applications are indicated with . The application may also be available in the **Applications** or **My Own** folder in the menu. The available folder depends on the device.

To write, send, and receive e-mails in Hotmail inbox, in the menu select **Messaging > Windows Live**.

Copyright protections may prevent some images, music (including ringing tones), and other content from being copied, modified, transferred or forwarded.

 indicates that there is a new version available for the application that you have installed. To replace the old version with the new one, scroll to an application, and press the scroll key, or select **Options > Get**.
